

NGUYEN THANH LONG

iOS & Mobile Engineer | SwiftUI · React Native · Full-Stack

thanhlong1404vn@gmail.com · (+84) 876 484 888 · Da Nang, Vietnam

Open to relocate to Singapore | Eligible for Employment Pass | English: Full Professional

SUMMARY

iOS and full-stack mobile engineer with 5 years of experience shipping production apps to the App Store and Google Play. Currently building the SwiftUI feed experience for a daily-use news app serving a major US metropolitan audience. Equally comfortable in Swift/SwiftUI and React Native on the client, and Node.js or Spring Boot on the server. Strong emphasis on unit coverage, performance optimisation, and release quality from a software-testing background.

SKILLS

Mobile: Swift, SwiftUI, UIKit, Swift Concurrency, React Native, Fastlane, Hot Update

Web: ReactJS, NextJS, TypeScript, JavaScript, HTML/CSS/SCSS, Tailwind CSS

Backend: Node.js, Spring Boot (Java), GraphQL (Apollo), REST, Socket.IO

Data: MySQL/SQL, MongoDB, Elasticsearch, Firebase, Redux / RTK Query

Cloud & CI: AWS (EC2, S3, Elastic Beanstalk), Firebase, Fastlane, CI/CD pipelines

Testing: XCTest, Jest, Vitest, unit testing, usability testing

Practices: MVVM, Coordinator pattern, system design, API integration, Agile, Figma

EXPERIENCE

iOS Developer 01/2026 – Present

Client project (US news publisher) — iOS news app modernisation programme

- Built SwiftUI feature modules on MVVM (ObservableObject + @Published) — kept presentation logic out of views and fully unit-testable.
- Adopted Swift Concurrency (async/await, Task, @MainActor) across the data layer, eliminating race conditions on concurrent refresh.
- Built reusable @ViewBuilder component libraries with adaptive iPhone/iPad layouts and a shared dark-mode token system.
- Reduced redundant network calls via cursor pagination and response/image caching; added shimmer placeholders for perceived performance.
- Bridged SwiftUI into a 380-file UIKit codebase via UIHostingController; instrumented typed analytics and XCTest coverage for view models.

Tech: Swift, SwiftUI, UIKit, MVVM + Coordinators, Swift Concurrency, Apollo GraphQL, Firebase, SDWebImage, Avo, Braze, XCTest

Web & Mobile Developer → Front End Developer 01/2024 – 12/2025

Real-estate management, leasing and sales platform — published on App Store & Google Play

- Built property search with multi-criteria filters, user authentication, in-app chat, and bulk file/image upload.
- Implemented contact sync (Google & Microsoft), Google Maps integration, and Stripe payments.
- Migrated data fetching to RTK Query and set up CI/CD release automation with Fastlane, shortening merge-to-store time.
- Designed responsive layouts for desktop, tablet and mobile breakpoints; ran usability testing to drive improvements.

Tech: React Native, NextJS, TypeScript, Redux / RTK Query, Stripe, Google Maps, Firebase, Tailwind CSS, React Native Paper, MongoDB, Fastlane

Full-Stack Developer (Personal Product) 01/2025 – 06/2025

Calorie, macro and fitness tracking app — 100K+ downloads on Google Play, 36K+ on iOS

- Built and maintain a nutrition & fitness tracker with personalised goal-based meal and workout recommendations.
- Developed extensive Vietnamese food library with detailed nutritional breakdowns; calorie/macro tracking + data visualisation.
- Implemented in-app purchases for the premium tier; ship regular performance and bug-fix releases on both stores.

Tech: Spring Boot, React Native, RTK Query, Elasticsearch, MySQL, in-app purchases

Mobile Developer 06/2023 – 12/2023

Mobile app for streaming video playback with a custom-built player

- Implemented real-time video stream rendering and customised the player (controls, scrubbing, playback states) to design specs.

Tech: React Native, JavaScript, video streaming, React Context, Jest, MUI, Figma

Mobile Developer — Resident Management System 01/2023 – 05/2023

QR-code system for managing people entering and leaving controlled areas

- Built device initialisation and QR-code scanning flows; implemented user authentication and real-time chat.

Tech: React Native, ReactJS, NodeJS, Firebase, Socket.IO, AWS S3, MongoDB, unit testing

Full-Stack Developer — Apartment Management System 01/2022 – 12/2022

Platform for managing apartment building services for administrators and tenants

- Designed database schema, design system and shared UI component library; implemented authentication, bulk upload and role-based web interfaces.

Tech: Java Spring Boot, ReactJS, NodeJS, AWS EC2, AWS Elastic Beanstalk, MySQL stored procedures, MongoDB

Full-Stack Developer — Healthy Living Everyday 06/2021 – 12/2021

IoT project — users record workouts with Mi Band smartwatches

- Built recommendation engine that reads Mi Band data and suggests foods/exercises matched to weight-gain or weight-loss goals; designed scoring formulas.

Tech: React Native, NodeJS, Xiaomi plugin, native modules, Firebase, MongoDB

EDUCATION

Danang University of Science and Technology 01/2021

Software Engineering

Enclave Bootcamp XIV 01/2021

Software Engineering Bootcamp — Frontend Developer | Mobile Developer track

CERTIFICATIONS

JLPT N3 — Japanese Language Proficiency (01/2022)

Udemy — Advanced CSS and Sass: Flexbox, Grid, Animations and More (01/2022)

LANGUAGES

English — Full professional proficiency · **Japanese** — Conversational (JLPT N3) · **Vietnamese** — Native
